

Since 1975

CONDENSING UNIT COVERS

Brinmar manufactures winter covers that are available in hundreds of different shapes and sizes - each designed to fit a specific condensing unit. The result is an attractive vinyl cover with a glove-like fit. They are made of a heavy-duty vinyl with a durable cloth backing that resists ripping and tearing. Brinmar covers are available in a neutral gray or beige color and the fabric is also specially treated to be mold, mildew and UV resistant. Our covers are secured with a convenient hook-and-loop strap sewn around a precision cutout for the unit's electrical and refrigeration lines.

Bottom vented covers are ½" to 2 inches short to provide airflow at the bottom of the unit where the cold damp air accumulates.

- Keeps out dirt and debris during off-season. Reduces maintenance costs and improves efficiency.
- Prolongs the life of condensing unit and reduces cabinet fading.
- Premium 24 oz. industrial vinyl fabric with a reinforced cloth backing. Gray or beige color to match cabinet.
- Tailored to fit the exact shape of cabinet – we have over 8,500 condensing unit models on file.
- Precision opening to fit electrical and refrigeration lines with convenient hook-and-loop closure.
- Material is specially treated against mold, mildew, fungus, UV and sub-zero temperatures.
